## DETAILED ACTION

### *Response to Amendment*

1. The reply filed on April 12, 2007 is not fully responsive to the prior Office Action because of the following omission(s) or matter(s): \*\*\*. See 37 CFR 1.111. Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment.

EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).

2. In the response dated April 12, 2007, the applicant elected species I without traverse in response to the Restriction Requirement set forth in the Office Action mailed March 13, 2007. However, the applicant did not list the claims readable on Species I.

### *Remarks*

3. In the Office Action mailed March 13, 2007, the examiner noted that the applicant had not filed a certified copy of the foreign priority document 198-07-094.2 filed in Germany on February 20, 1998. The applicant indicated that a copy of the priority document was provided in the application No. 09/255,137. The examiner has reviewed the application No. 09/255,137, and the record appears to indicate that the priority document was submitted. However, the priority document 198-07-094.2 does not appear to be included in the record of application No. 09/255,137. The applicant is

Art Unit: 2851

requested to provide a new copy of the foreign priority document in order to make the record clear for the present application.

4. In the response dated April 12, 2007, the applicant amended the first paragraph of the specification to include the priority of application 09/255,137. The applicant is advised that the cross-reference information should also indicate the status of the priority applications, i.e., application 09/255,137 is now abandoned.

5. The examiner also notes that the Oath/ Declaration and the Utility Patent Application Transmittal do not clearly set forth the information for applications 09/934,817 and 09/255,137. Correction is requested.

#### ***Election/Restrictions***

6. This application contains claims directed to the following patentably distinct species:

- a. Species I – Figure 1
- b. Species II – Figure 2
- c. Species III – Figure 3a
- d. Species IV – Figure 4
- e. Species V – Figure 5b
- f. Species VI – Figure 7
- g. Species VII – Figure 8

The species are independent or distinct because the embodiments would not render them obvious of one over the other.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, **and a listing of all claims readable thereon**, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

7. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
